Determined and Keeps Positive Mentality. **Achievements:** Reaching 75.3K views and 2.03K comments and Number 1 Ranking on its own tag on a published writing story that I have not finished.

EXPERIENCE

Customer Service Associate

WALGREENS | FAIR LAWN, NJ | 2020 - PRESENT

Started working at Walgreens when the pandemic hit so I can help support my family after the passing of my father. Because of the need for me to work many shifts, I was not able to have after-school extracurricular activities but to make up for it I made sure to enhance my skills in the course I plan on majoring in.

- Team player, always communicated with my coworkers to make sure everything was done in an orderly fashion and on time.
- Managed to receive customer reviews speaking highly of me, lots of customers enjoying my presence and help. Top earner because of the hours I worked.
- Pick up as many shifts as possible to make sure I was making enough to help pay my family bills.

CODING LANGUAGES

HTML, CSS, PYTHON, C#, C++

Started working on my coding skills in sophomore year when I took my web design class. I enjoyed the class so much that after school I would come home and work on my own little websites and projects. Some projects are,

- **Restaurant Website;** menu page, home page, contact page, history page all with animation using HTML and CSS, using Bracket code editor.
- **Ping Pong Game;** made a mini ping pong game, with working timer and scoreboard, using Python with Visual Studio Code editor.
- **Endless Running Game;** a small game like Subway Surfers and Temple Run using Unity with C#, using many tutorials and learning from mistakes.

RELEVANT COURSEWORK

WEB DESIGN, TECH DESIGN, and SELF TAUGHT at home.

I took Web Design, Computers in Graphic Design and Tech Design during my school years. Enjoyed Web Design very much getting an A+ as my final grade. Took Computers in Graphic Design, getting an A as my final grade. Currently enrolled in Tech Design, enjoying the class and maintaining an A.

- **Web Design;** learned HTML and CSS and through my curiosity also learned a little bit of JavaScript.
- **Tech Design;** learned the Engineering Design Process.
- **Self Taught;** most of my knowledge is self-taught considering I did not have much time for after-school learning activities.
